

Modulbezeichnung	Corporate Finance in a Global World: Challenges and Opportunities	
Semester	2	
ECTS-Punkte (Dauer)	6 (1 Semester)	
Art		
Studentische Arbeitsbelastung	42 h Kontaktzeit + 138 h Selbststudium	
Voraussetzungen (laut MPO)	Basic understanding of financial concepts is beneficial	
Empf. Voraussetzungen	keine	
Verwendbarkeit	MaMC	
Prüfungsform und -dauer	Presentation	
Lehr- und Lernmethoden	Seminar Style with guest lectures and case studies	
Modulverantwortlicher	Wolf	
Qualifikationsziele	Financial markets around the world have become more accessible than ever before. And yet every country is different, with its own set of financial, accounting, legal and fiscal systems, and its own cultural norms, so the question arise whether we can use the same corporate finance concepts when we cross borders. This course introduces students to corporate financial decision making in an international context.	
Lehrinhalte	Students will study the most important financial decisions the corporations make: capital structure, risk management, capital raising, mergers and acquisitions. learn about the legal framework of the firm as well as more technical aspects of valuation and risk management techniques. examine real decisions made in India, Russia, Venezuela, Japan, Vietnam, and China. differentiate between the challenges and opportunities in a global setting considering political and exchange rate risk and differing corporate governance standards. formulate strategy recommendations for real companies, with the goal of developing real shareholder proposals.
